When installing a TV above the fireplace, the chase of the fireplace must be vented. This can be done by either installing a grill on the front or sides of chase (for a chase that bumps out into a room) or be open at the top of the chase. (See installation manual for further information).

*Degrees above room temperature are surface temperatures of a TV mounted 1 1/2" off the wall above the fireplace. This in no way indicates what the wall temperature above the fireplace is. Check with your TV manufacturer for normal operating temperatures.

Crafted entirely in Canada, each Marquis fireplace is built to the highest standards and made to last.
